ENERGY STAR® WORKSHOP

Guam Energy Office, through special funding from the U.S. Department of Energy, conducted Energy Star® workshops in Guam and the Republic of Palau on January 25 and 26, 2006, respectively.

The Energy Star® workshops were well-attended by audiences from the public and private sectors.

Darren T. Kimura, President and Chief Executive Officer of Energy Industries of

Honolulu, Hawaii, provided training on the Energy Star® Portfolio Manager, a program tool for determining a building's energy saving potential to qualify for an Energy Star® Building certification.

Receiving such certification from the Energy Star® Program means that your building uses energy efficient equipment and appliances to save dollars on power bills and to help the environment stay clean.

Darren Kimura, Energy Industries, Hawaii, with the Guam audience at the Westin Resort Guam on January 25th...

... and with the Palauan audience during a workshop held at Palau Community College, Koror, Palau, on January 26th.
