efficiency news - industrial

**Energy Industries opens Puget Sound office**  
by Linda Anderson - 3.24.06

Honolulu-based Energy Industries LLC has opened a sales office in Bellevue, Wash., adding to the company's Northwest presence. Founded in 1994, the energy services company now operates 12 offices throughout the world.

The office opening follows the company's purchase of Quantum Lighting of Spokane in 2005. The purchase allowed the company to broaden its lighting offerings to include scheduled lighting maintenance, including emergency repair services, for commercial and industrial accounts. It also offers data-com maintenance, installation and repair.

Energy Industries founder Darren T. Kimura is host of the recently launched Energy Smart News (ESN), a weekly Internet radio program featuring guest speakers and promoting energy-efficiency. As of mid-January, the program had been downloaded more than 3,000 times, according to the company.

"We're trying to get the industry to move forward faster by sharing information and promoting energy-efficiency," Kimura said of the program.

Energy Industries employs 200 people who specialize in designing and delivering energy management and conservation programs for commercial and industrial customers in the United States. The company also operates a 24-hour National Accounts Center.
